

This country needs the level playing field of the current internet and faster for economic growth. Choking the speed for small companies will hinder growth of the start ups. Switching back to Title I status is only freedom for large companies to charge more with their blackmail speed control.

This is not freedom for Americans it is a theft of a UTILITY from consumers, tech manufacture's, why innovate when when it will only be choked. The internet is too slow now for certain industries don't make it slower.

This is a further concentration of wealth and power in fewer hands. A real boost to the economy would be to spread the wealth around so it goes through the economy more time faster.
